MORE THAN 50% LONGER NON-SKID MILEAGE in the New Firestone

dark sides and white Manks, has o'clock hour, as a special program

HE new Firestone High Speed Tire for 1934 is the greatest tire Firestone has ever built. With its wider, flatter tread, greater thickness, deeper non-skid, more and tougher rubber, and greater non-skid contact with the road, you get more than 50% longer non-skid mileage. This new development is made possible by the Firestone patented process of Gum-Dipping, whereby the cotton fibers inside the high-stretch cords are soaked and coated with pure liquid rubber. This provides greater strength,

HIGH SPEED TIRE FOR 1934

safety and blowout protection. Firestone engineers pioneered and developed the first successful balloon tire in 1923, and it is only natural that Firestone would lead

in the further development of tire construction to meet the demands of the high-powered high-speed cars of The new Firestone High Speed Tires for 1934, have already

proved their worth by constant testing on the Firestone fleet of test cars over all kinds of roads and highway throughout the United Firestone High Speed Tires are

further subjected to, the most severe tests known on the greatest proving ground in the world - the Indianapolis Speedway. In fact Firestone Tires have heen on the winning cars in the annual 500-Mile Indianapolis Race for fourteen consecutive years-

Firestone 11.30 | 6.50-17HD 17.50 conclusive evidence of Firestone's outstanding leadership in tire development and construction. Drive in today and replace your thin, smooth, worn tires with a new set of the Safest-Longest Wearing-and Most Dependable Tires Firestoine has ever made

THE NEW Firestone FOR 1934 The new Firestone Air Balloon for 1934 embodies all the improvement in the new Firestone High Speed Fire. The lower air pressure provides omfort, Gum-Dipping Safe-T-Locks he cords, provides 30 to 40% greater deflection and blowout protection. Get 1935 low swung style by equipping your car today with these new tires and wheels in colors to

GRAVE YARD WORKING AND let her stay here on earth with place an early date.

TIRESTONE has maintained its leadership in tire development by producing a new tire for 1934 with a wider tread, flatter contour, deeper non-skid, greater thickness, and more and tougher rubber, which gives greater non-skid safety, more traction, greater blowout protection, and more than 50% longer non-skid mileage.

These achievements are made practical by the Firestone atented process of Gum-Dipping, providing greater adhesion | Jackson, Elba Rt. 1; Wiley C. between the plies of the high stretch cords and between the Gum-Dipped body of the tire and the tough, massive non-skid tread. It also provides greater strength, longer flexing life, and greater protection against blowouts. Gum-Dipping
